Dear Valued Partner,

Please take a moment to look over our line card. You may find that we can assist you in certain areas of your business. Please don't hesitate to call our knowledgeable sales staff and visit our web site for additional information. The product pages there contain useful information.

Best Regards

Doug Collver, President

Western Roller Corporation

"P-2000" Dual Hardness urethane rollers features cast bores, keyways and special mounts. Diameters from 1" to 9-15/16" and widths to 12". Choose from eight hardness's and create custom rollers from our standard tooling. Pictured Left to right: **Weinig** feed through moulder & rollers for a **Multiscore** Panel Rip and Crosscut Saw.

"SUPER DRIVE" The original soft feed roller / replaceable tire system. Solid urethane tires 3-1/4" to 10" diameter mount on steel hubs that are bored and keyed to your specifications. Tires are available in several hardness's. Purchase the hubs only once and replace the tires as needed. Pictured Left to right: Feed through moulders including: **Weinig** (pictured), **Wadkin**, **SCMI**, **LMC**, **Diehl** and **Mattison**, Feed Tables, **Mid-Oregon** pictured.

"SUPER DRIVE" for large planer and planer matchers including: **Coastal**, **Newman Whitney**, **Stetson Ross**, **Woods**, **Yates American** and others. These steel hubs and polyurethane tires are available in 10-1/4", 12-1/8", 14-1/8" and 16" diameters. Two sizes are available in both split and non split styles and standard and wide widths.

"SUPER FEED" Replacement rollers, are available for all power feeder makes and models. Belts and belt conversion kits are also available for the larger 3 roll stock feeders. Our P-2000 series rollers are also available for many stock feeders in two standard hardness's. Pictured Left to right: **Maggi** Power Feeder with WRC belt conversion kit & **Maggi** feeder with our replaceable tire system.

"POLY TUBE" Polyurethane tubing has hundreds of uses. Press onto hubs or driven shafts for light & medium duty feeding applications. Insert flanged bearings or bushings to create hold down and guide wheels. Makes excellent bumpers, shock absorbers and cushions. Pictured to the right: **Ritter** Shape and Sand System.

CUSTOM: Molded polyurethane parts of all kinds including: bearing covers, bonded rollers, **Jenkins**, **Challoner**, **Greenlee** and **Hein** tenoner hold down pads, **Makita**, **Delta**, **Jet**, **Riobi**, **Powermatic** and other surface planer roller covers and specialty parts cast to your specifications.
